

## Company Abstract

**HGIS Corp.** was founded in April of 2002 and incorporated in the state of California in 2004. HGIS Corp specializes in the development and support of custom Microsoft .Net application development and provides database consulting services to businesses and professionals.

Our applications are not your typical off-the-shelf applications but are customized solutions to meet the specific business needs and requirements of our clients. These custom applications are aimed at solving routine or complex business challenges faced by many businesses and professionals.

We strive to provide our clients with easy to use custom applications that are unique to their business demands and can grow as their businesses develop. We work closely with our clients, from management to end user, in analyzing their current processes and information needs. This client interaction provides a thorough understanding of the requirements of the requested solution. We offer advice and suggestions for efficient information processing, always keeping in mind that the client is the expert in managing their successful businesses.
